

FLORY CC70
WINDROW
CONDITIONER

FLORY CC70

WINDROW CONDITIONER

FEATURES

- Simple yet effective conditioner designed to remove trash from the windrow to reduce drying time and increase harvest speed
- Deliver a cleaner product to the huller, which reduces costs and increases crop quality
- Connects to most nut harvesters and only requires two hoses for operation
- Easy to use electric over hydraulic controls
- Tapered V-Blade levels ground below in preparation for the windrow
- Nut box with hydraulically actuated gate, gently returns the clean crop to a windrow and acts as a retention hopper between rows to eliminate hand raking
- Adjustable windrow width
- Stick box conveyor deposit the sticks at the end of each row
- Turn signals and flashers for improved road safety
- Video camera with nut box view

OPTIONS

- Monitor for Camera
- Stick Box Camera
